

AcuCheck

Unlock Full Acumatica ERP Performance

AcuCheck is a comprehensive Acumatica System Assessment. We identify operational strengths, diagnose inefficiencies, and recommend strategic improvements to maximize your Acumatica investment.

Scope of the Assessment

System Configuration Audit

Review of system setup, architecture, and best practice adherence.

Workflow and Process Evaluation

Analyze if your workflows align with your business processes for optimal performance.

Module Utilization Analysis

Identify underutilized, misused, or redundant modules.

Performance Health Check

Assess system performance, speed, and scalability readiness.

Gap and Risk Identification

Spot issues that could impact stability, compliance, or future growth.

Optimization Recommendations

Provide actionable, prioritized recommendations for system enhancement and ROI maximization.
